

STELLIUM INC PARTNERS WITH THE UNIVERSITY OF TEXAS, DALLAS, FOR MS MANAGEMENT STUDY PROGRAMS

Houston– TX, USA, 15 June 2020 – Stellium Inc, an award-winning supply chain and manufacturing consulting company with expertise in Supply Chain, Business Process Management, SAP products, Mobility solutions, and Business Process Automation , partners with the University of Texas, Dallas (UTD), to provide real industry experience and perspective to the students of the MS Management Science program.

Stellium has the vision to collaborate with top educational institutions across the world and create opportunities for young minds to experience practical industry exposure in critical Supply Chain Planning processes, real world scenarios and solutions. Stellium intends to nurture young talent and through them contribute to the next revolution in Supply Chain through technology and process innovation.

Excited about the partnership with UTD, Stellium Inc CEO, Randeep Nambiar states “It is in the Stellium DNA to drive innovations through new ideas. I see this collaboration and deep engagement with UTD as an important strategic step. It will funnel innovation in supply chain powered by the next generation of talented leaders and our technology platforms.”

Talking about the partnership, Program Director, Dr Scott Janke “A partnership between UTD and Stellium is an exciting opportunity. We, at UTD strive for our students to understand the importance to continually seek out opportunities to improve both the effectiveness and efficiencies in Supply Chain processes. Having Stellium as a partner will ensure our students have real world application of their classroom subject matter. Students within the Management Science program will be able to participate in strategy and process case studies supplied by Stellium as well as have access to their innovative Lighthouse application.”
